EDUCATION

Master of Science in Business Analytics

Rady School of Management, University of California San Diego — San Diego, CA

Expected May 2026

Relevant Coursework: Financial Modeling, Optimization, Econometrics, Data-Driven Decision Making, Operations Analytics

B.A. in Marketing

Tecnológico de Monterrey — Monterrey, Mexico

May 2023

PROFESSIONAL EXPERIENCE

Data & Strategy Analyst

Index — Tijuana, Mexico

2023 - 2024

- Analyzed 10K+ customer and sales records using **SQL and Excel**, identifying high-value segments that increased campaign ROI by **18%**.
- Built dynamic pricing and revenue forecasting models incorporating cost structure assumptions, improving margin projections by **15%**.
- Developed automated reporting dashboards in **Tableau**, reducing manual reporting time by **35%**.
- Conducted competitive and market landscape analysis across 8+ competitors to support executive-level strategy decisions.
- Translated analytical findings into actionable recommendations for commercial and operations teams.

Marketing & Business Analyst

La Familia — Remote

2023 - 2026

- Used **Python (Pandas, NumPy)** to analyze operational performance data and identify inefficiencies, reducing turnaround time by **12%**.
 - Modeled resource allocation and cost scenarios in Excel, uncovering approximately **\$60K in annual cost savings**.
 - Standardized forecasting templates and KPI tracking tools, reducing reporting variance errors by **25%**.
 - Collaborated with technical and business teams to align operational performance with financial targets.
-

ACADEMIC PROJECTS

Technoeconomic Financial Modeling Project

UC San Diego

- Developed a full **CAPEX/OPEX-based financial model** evaluating project viability under 5 demand and pricing scenarios.
 - Conducted sensitivity analysis on utilization rates and cost volatility, identifying variables that impacted projected IRR by up to **20%**.
 - Automated scenario simulations using **Python**, reducing model recalculation time by **40%**.
 - Built a Tableau dashboard to visualize breakeven timelines and profitability thresholds for non-technical stakeholders.
-

TECHNICAL SKILLS

Programming & Data: Python (Pandas, NumPy), SQL

Analytics & Visualization: Excel (Solver, Financial Modeling), Tableau

Modeling & Finance: Forecasting, Scenario Analysis, Sensitivity Analysis, Cost Modeling (CAPEX/OPEX), ROI & IRR Analysis

Business: Market Intelligence, Competitive Analysis, Strategic Planning

PROFESSIONAL AFFILIATIONS & LEADERSHIP

- Graduate Business Student Association, UCSD (2025 - 2026)
- Sustainability Club, Tec de Monterrey (2019 - 2023)
